---

I am writing to demand adequate funding for home heating assistance for the poor this winter.

Between the wretched condition of the economy and rising costs for energy, housing, fuel and necessities, this is a serious social and public health emergency. If Lansing legislators can't see do something about it, shame on you! What good are you?

It is outrageous and unconscionable that there even has to be a message like this. Providing the can be safe in their homes should be the first thing you are concerned about and take care of, w having to be urged to do so by constituents. Take care of business for those most in need!
